

Owen Kealey

Software Engineering

“

Although just a high school student, I have experience in full stack development. Since about 3 years ago, I have been building end user applications that many have grown to love and use daily. When writing a new app, I typically create a Python backend running a webserver that serves local html5/css/js files to the user in a browser, usually Electron or CEFPython. Thus, I am adept in creating and debugging full stack applications. You can learn more about my business here: <http://www.grandstreetsupreme.com> and about me here: <http://owenkealey.io>

Education

St Peter's Prep
High School

Jersey City, New Jersey
Graduating June 2019

I am your typical straight A honors student. I have taken all the CS courses my school has to offer while also leading the machine learning group at our school's programming club and am currently helping to organize <http://makespp.com>

Employment History

St Peter's Prep
Manager

Jersey City, New Jersey
June 2016 - Present

I currently manage the full repair process of any of my schools's 1200 student delegated Chromebooks.

Grand Street Supreme
CEO

New York, New York
July 2016 - Present

I started and founded Grand Street Supreme in July of 2016 and since then it has grown to be a 6 figure software business. I currently maintain a Discord group(Discord!!) of around 400 active users of my current flagship project. I provide customer support, handle company financials and actively maintain the software, providing updates regularly.

Hobbies & Interests

I like developing software and ocassionally gaming. I also somewhat enjoy playing ice hockey and the guitar. But mostly, my time is allotted to my business and school.
